To Whom It May Concern:

I am a business partner responsible for building Tuscany by the Sea Condominiums in Indian Rocks Beach, FL. This building is one of the finest developments in the area complete with spacious condominiums with large decks overlooking pristine beaches and a courtyard. The street entrance offers a large Porte-cochere with ground level parking and a peaceful fountain setting.

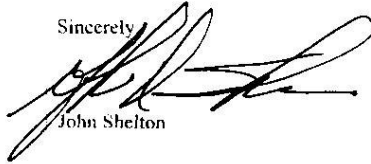

What makes the building one of the most beautiful in the area, is the magnificent beauty of the architectural cast stone that was used on the building. Not only does the stonework make you stare in awe, but it captures the Tuscany design we were looking for.

AAA Cast Stone, Inc. worked closely with us in every detail to make the design unique to our project. They had a solution to every situation at the job site, and were very pleased to accommodate and provide their services. Their professionalism was beyond what we expected and their crews worked with such teamwork that the entire job went very smoothly.

Just some of the custom stone they designed for us are the special Tuscany balusters, pier caps, newels posts, and uniquely designed fireplaces in individual's residences.

My overall experience with AAA Cast Stone, Inc. was exciting and impressive. I am confident this trustworthy organization would benefit any contractor, homeowner and architect that are interested in building a palatial home.

Sincerely,

John Shelton
